

## Bullard Fireman's Helmet

Firedome FXE helmets are designed to give firefighters the extra edge that tips the odds in their favor. Featuring contemporary styling, these helmets incorporate recommendations from veteran fire professionals from around the world. The result is an integrated assembly of advanced materials and quality components that provide outstanding head protection, superior comfort, long-lasting durability and proven on-the-job performance.

### Features

- superior comfort - A low center of gravity provides the FXE with a balanced and stable fit, increasing overall comfort.
- quick, easy sizing - Bullard's Sure-Lock® ratchet headband adjusts to wearer's head with a quick turn of the knob. Additional adjustment points permit custom fit, personalised balance and interface with the SCBA.
- tough and durable protection - The outer shell of the FXE is made of fiberglass and is more resistant to chemical attack and more stable at extreme temperatures than those made of thermoplastic. The color is molded through the shell.
- cost-effective maintenance - Bullard helmets are designed from the start to make maintenance simple and cost effective. For example, the browpad can be easily removed and cleaned. competitive helmets have browpad sewn into the headband making an awkward cleaning and very expensive replacement.
- maximum visibility - FXE helmets feature 3M Scotchlite® striping which retains reflectivity to 260° C (500° F). That makes Scotchlite the toughest material available for helmet markings.

### Unique faceshield

FXE helmets also feature the unique R310 optically-correct faceshield. The R310 eliminates distortion and reduces eye stress and fatigue.

### TECHNICAL SPECIFICATIONS

Size	52-62
Colors	Available in yellow, red, black and white
Approvals	CE EN443 EN166
