

Rescue-Dan W3 Life Jacket Light

Water activated. Approved according to EC and USCG.

General information

All Daniamant life jacket lights are designed to deliver, as a minimum standard, the 0.75cd output specification and 8 hour duration required by IMO SOLAS regulations.

This new, low profile light is a single compact flashing unit. The light is emitted through an ultra low profile dome, making the light less susceptible to damage during evacuation. Easily fitted with two different backing plates, one to go over a thin strap and one to go over a 5cm belt. This is the automatic version of Dan M3. The light activates automatically when in water and can be turned off manually if required. The light has the same attachment arrangement as Dan M3.

TECHNICAL SPECIFICATIONS

Color light	Blue
Light – Output	Minimum 0.75 cd
Light – Duration	Minimum 8 hours
Light – Type	Flashing LED
Material	ABS Polycarbonate / TPE
Storage Temperature	-30°C to + 65°C
Operating Temperature	-1°C to + 30°C
Storage Life	5 years
Weight – Nominal	35 gr
Battery Type	Lithium Manganese Dioxide
Activation	Water / Manual
Approvals	SOLAS / MED / USCG
