

## Secumar Survival 275 Duo Protect

275 N inflatable offshore sailing lifejacket with robust buoyancy chamber with twin skin buoyancy chamber for double protection against mechanical damage. Exceptional wearer comfort through ergonomic pre-shaped shoulder area. Integral harness with textile D-Ring. Adjustable padded back strap. SECUMAR 'winglet' buoyancy chamber for higher freeboard and stability in the water. Approved to DIN EN ISO 12402-2.

### Applications

The Survival 275 Duo Protect is an offshore sailing lifejacket. It was ergonomically developed with more freedom of movement for the head and neck. That's the definitive design element for exceptional wearer comfort in this new SURVIVAL model. The secret is in pre-forming the shoulder area. So it remains stable and doesn't 'load up' on the back of the neck.

The buoyancy chamber is shaped in the high performance WINGLET-design for better freeboard and turning power. It is equipped with an durable multi-layer skin, called Duo Protect system. This is an inner protection for the buoyancy chamber against mechanical damage. It offers a higher resistance against wear and tear even during intensive use. An integrated deck safety harness is equipped with a textile D-Ring to reduce weight and avoid scratches on deck.

The shorter cut, rear padded webbing harness as well as having a front 'Click' buckle all add to the wearer's comfort. Bt it's not short on safety – Crutch strap and sprayhood as standard. PLB and SOLAS light optional. All these features make the SURVIVAL 275 Duo Protect the perfect offshore sailing lifejacket.

### Integration of emergency transmitters

This lifejacket is designed to accept the AIS-SART easyRESCUE A040-BW-COM, but the following transmitters may be integrated using an optional extra pocket:

- Ocean Signal PLB1,
- Kannad SafeLink R10

### TECHNICAL SPECIFICATIONS

Type of buoyancy / Method of inflator	Inflatable / Automatic inflator 400 1S60 g CO <sub>2</sub> Dock
Buoyancy chamber system	SECUMAR Winglet buoyancy chamber, SECUMAR Duo Protect, dual walled system, retro-reflective strips, dedicated light attachment point, in protective cover
Standard equipment	In protective cover, Softshell neck area, oral valve, whistle, manual override, reflective strips, firing mechanism access zip, suspension loop, lifejacket storage bag
Color	Blue
Harness	Yes
Approvals	DIN EN ISO 12402-2 (CE mark), DIN EN ISO 12401 (integrated deck safety harness)
