

## Unifire Spray Nozzles

The Unifire V-nozzle serie is a multi-purpose fognozzle with very good performance for both fog and jet. The V-nozzles are available in both long and short versions. The V-nozzle can be combined with an attachable foam-tube for heavy and medium foam.

### Features

The Unifire V-nozzle is proven to be very reliable. It's designed for heavy professional use and no maintenance is required. The only spare part is the baffle and its crew.

The Unifire V-nozzles are available in sizes 7, 10, 12,14,16,18 and 20.

### Material

The nozzles is made of chromeplated brass, red plastic cover and rubber bumper head.

### Delivery

Delivery excluding connection.
